Apostolka Christov

I design | Software Developer | Audio-Visual Artist | Intellectual Enthusiast

Bonn, North Rhine-Westphalia, Germany

Summary

I caught fire designing systems. My career path has been a dynamic mixture of experiences from exploring the retail and lifestyle industry to setting the stage in the entertainment industry as a lighting designer, music and event production specialist, an artist, to transitioning in the IT as a software developer. Over the years, I've gained a diverse skill set, bringing both artistic vision and systemic thinking to the solutions I build. I combine solid design thinking, technical expertise, a strong analytical mindset, and an inclination to problem-solving. I thrive in creative fast-paced agile environments. I'm well-versed in Python, Django, JavaScript, Git, PostgreSQL, Docker and modeling languages like C4, UML, and BPML and Figma, Axure, touchDesigner and Structurizr for the visualization of system architecture and solution designs. With experience in Unix systems (Linux, macOS) and DevOps practices, I'm committed to creating sustainable solutions. Always curious and result-driven.

Experience

PROUNIX

7 years

Software Developer - Applications

February 2022 - Present (4 years 4 months)

North Rhine-Westphalia, Germany

Software Developer

September 2019 - January 2022 (2 years 5 months)

North Rhine-Westphalia, Germany

Developer

June 2019 - August 2019 (3 months)

North Rhine-Westphalia, Germany

Education

Heinrich-Hertz-Europakolleg Bonn

Computer Science · (September 2019 - June 2021)
